Apostolos Karamanis

Applied Informatics Student

2x Hackathon Winner

EXPERIENCE

Web Developer

Freelance

Oct. 2024 - Present

Designed and developed multiple web applications and sites from scratch. Focused on delivering a seamless UI and UX with a lean design while maintaining functionality and ease of use.

Co-Founder (non-professional)

JourneyJolt

Feb. 2025 - Present

Built a unique AI-powered travel solution, which won first place at the Netcompany Hackathon designed for both individual and group travelers. The agent handles the entire trip-planning lifecycle using Advanced AI LLM's and API's to create the ideal vacation plan.

Lead Developer (non-professional)

Galaxia Invaders

May 2024

Lead the Developing of the Game, with the accountability of the level design and general balancing. The game was entirely coded inside the Godot Engine with our own audio and visual assets.
